These include your images, themes, frames, fonts, and plug-ins, all of which are ready for you to use. You can create multiple Bridge documents and load images into each one. Bridge's interface has three windows and a sidebar; these windows show previews of your images, along with additional panes that show metadata, such as image resolution and file size. Your images can be used as thumbnails in the center panel that has a ruler, smart objects, and other editing and organizing features. Bridge has many tools that make working with images a snap, from the powerful batch renaming and selection tools, to library-based batch processing, including resizing and rotating. This is an extremely shortsighted approach to success, and if a company isn't looking beyond the borders of its existing market, it will be limiting its potential for growth and overall prosperity. It's a strategy that many companies use when it comes to the nautical business. Because of the unique nature of this industry, many companies limit their search to one segment of the market. As a result, they are missing out on big gains in revenue, and instead of being an effective platform for their customers to interact with, they become a boring, monotonous business. Luckily, there are a lot of opportunities that exist outside the maritime space, and many companies that have been looking to expand have been missing out on them. That's why European buyers flocked to the Eurocity expo, especially since they missed out on some of the best events during Eurosea.
